

# Laundry Owners:

## *Would you like to improve your profits from your operation?*

The answer: simply replace those water and energy guzzling agitator machines with the next generation of tumble action models. You'll cut your water, sewer, and energy bills by up to half and that equals money in your pocket. And your customers will get cleaner clothes with the new gentle motion of the front loading machines.

But wait, there's more! Your local gas and water utilities have partnered to provide you with an additional cash incentive of up to \$500.00 for each machine you purchase.

Still not sure this is the program for you? Consider these extra benefits and enhancements for you and your customers:

- ◆ Fewer parts for reduced maintenance cost
- ◆ Faster spin cycles means less energy output for the dryers
- ◆ Less detergent needed
- ◆ The new machines handle larger bulky items with ease

Make the switch now and reward yourself with up to 50% savings on utility costs, increase your customer satisfaction, and receive a \$500.00 rebate for each machine purchased from your utility provider.

Don't miss this special opportunity. This offer will never be better. Just complete and return the attached application and you will receive a letter detailing the steps to qualify.

***Please Act Now.***
